DC Blue Astute

Technical Specifications

SPECIFICATION	NICE DC BLUE ASTUTE
Application door types	Sectional overhead and trackless tip-up doors
Application door sizes	Up to 15 m ²
Primary power supply	85-264 VAC @ 47-63 Hz
Primary power consumption	<36W
Motor voltage	24 V DC
Maximum operation per day	5 cycles per hour
Rated auxiliary output	<1 A @12VDC
Rated battery charging voltage	28.8 VDC
Battery compatibility	LiFePO4, SLA
Battery reserve options	<70 cycles*
Drawbar options (Ex-stock)	2.2M/3.2M/3.7M
Maximum running distance	8M
Traveller speed	8M/min
Maximum load prior to anti-crush safety sensing/governing (Force)	1000N
Anti-crushing safety sensing/governing	Yes - As per IEC SANS Safety Regulation
Safety beam output	Yes - Smart EOL monitored
Compatible transmitters	Nice MyGo2/AU
Receiver frequency	433.92 MHz
Receiver functions	BT: Open/Close door, LT: Switch light on/off, Lock-out enable/disable
Receiver memory capacity	35 users
All users can be allowed control of all channels	Yes
Ingress protection	IP20
Operating temperature	0 to 45C (32F to 113F)

About DC BLUE ASTUTE

DC Blue Astute is a 24V DC garage door motor with built-in lithium battery backup, hi-speed charging and smart safety monitoring. Designed for both sectional overhead and trackless tip-up doors, it delivers strong performance, quiet operation and long-term reliability

It's engineered for reliable everyday performance, with intelligent monitoring in a compact, installer-friendly motor.

COMPATIBLE ACCESSORIES

MyGo2/AU
Remotes

F210/FT210
